

The FAA Safety Team presents:

Busting At The Seams

You know all there is to know about weight and balance, right? Attend this exclusive safety briefing and find out. We will discuss the effects of longitudinal and lateral loading on aircraft performance in maneuvering flight. You will leave this brief with an understanding of why your aircraft behaves the way it does under specific load conditions, armed with examples of tools and techniques to ensure your operations remain within the flight envelope from takeoff to touchdown. Click on the link below to register TODAY!

Directions: Rt 209 to Enterprise Dr. North 1/10 mile left to Town Hall complex. Senior Center building is on left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
